INJURY REHAB

YOUR QUESTIONS ANSWERED

Being in an accident is stressful enough. Getting the care you need shouldn't be. Here are answers to the questions we hear most often.

Do I need a lawyer before I can be seen?
No. You can contact us before you have an attorney, and we can often help connect you with a trusted personal injury attorney if you need one. What matters most is that you get evaluated quickly — delays in care can affect both your recovery and your case.

Will this cost me anything out of pocket?
In most cases, no. We bill your auto insurance directly, so there is no upfront cost to you. When insurance coverage is limited or a legal claim is involved, we can work on a medical lien basis, meaning we bill upon settlement or case resolution. Either way, you won't be asked to pay out of pocket to begin care. You focus on getting better; we handle the billing on the back end.

I already went to the emergency room. Do I still need to come in?
Yes, and soon. The ER is designed to rule out life-threatening conditions, not to manage the ongoing effects of a musculoskeletal injury. Many patients leave the ER with pain that continues for weeks or months. We pick up where emergency care leaves off, with a focused rehabilitation plan built around your specific injuries.

How quickly can I be seen?
We offer same-day appointments. Call us and we will do everything we can to get you in that day.

What kinds of injuries do you treat?
We treat the full range of injuries common to auto accidents: neck and back pain, whiplash, soft tissue injuries, joint pain, headaches and more. Our physician-led team evaluates each patient individually and builds a care plan around your specific injuries and goals.

What does treatment actually look like?
Depending on your injuries, your care plan may include chiropractic care, functional rehabilitation, assisted stretching and massage therapy — all coordinated under the oversight of our board-certified physician. Everything is designed to work together, not as disconnected services.

Will you communicate with my attorney?
Absolutely. We work alongside your legal team from day one, providing timely documentation, detailed clinical records and any reports needed to support your case. Clear, accurate records are a core part of what we do.

What if I'm not sure whether my injuries are serious?
Come in and let us evaluate you. Many auto injury symptoms — stiffness, soreness, headaches, sleep disruption — feel minor at first and worsen over time when left untreated. An early evaluation costs you nothing and gives you a clear picture of where you stand.
